

Meeting Notes:

- Time: Tuesday 1:00 PM - 1:45 PM
- Planned out different branches to use to avoid pushing straight to the main branch, allowing for everything to be sorted and all commits to be reviewed before being pushed
- Talked with Bhargav during our weekly meeting about the commits we made over the last week, discussing how we feel so far.
 - Also talked about expectations we need to meet each week, making it clear concise what must be done to get full credit each week
- Decided to finish setting up all pages/partials, allowing to at least have the display up, not worrying about full functionality until later on, once POST/GET routes are fully set up and functional
 - Assigned people to set up paths in the .js file, finish up the pages
- Decided to add more user stories to the project board
- Talked about various other ideas we can add to the project possibly if we finish up earlier than expected
